NOTE:

1. Regular classroom interaction with industry experts is to be ensured in all theory courses (minimum two expert talks from relevant Industry).
2. Working on experiments using virtual labs is to be ensured in lab courses.
3. Student's visit to Industry/Industry Expert's project site must be arranged as & when possible.
4. The Mini Project or Internship (4 - 6 weeks) conducted during semester break after VI semester will be assessed during VII semester.
5. Project work is to be identified during VI semester, Initiated in VII semester (KCE 753) and completed in VIII semester (KCE 851).

Program Outcomes (POs)

Engineering Graduates will be able to:

- Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Director
Hindustan College of
Science & Technology
FARAH (MATHURA)

5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and teamwork:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcome (PSOs)

Graduates are expected to attain program-specific outcomes within three to four years after graduation. The following PSOs of the Department of Civil Engineering have been laid down.

1. Inculcating in students technical competencies to design and build civil engineering-based systems in the context of environmental, economic, and societal requirements.
2. The ability to acquire and update knowledge continuously and provide engineering solutions to meet the environmental and societal needs.

Director
Hindustan College of
Science & Technology
FARAH (MATHURA)

Department of Civil Engineering

Course Outcomes (COs): B.tech 2nd, 3rd and 4th year

Session: 2024-25

		III-Sem	
KCE301	Engineering Mechanics (EM)	CO1	Use scalar and vector analytical techniques for analyzing forces in statically determinate structures.
		CO2	Apply fundamental concepts of kinematics and kinetics of particles to the analysis of simple, practical problems.
		CO3	Apply basic knowledge of mathematics and physics to solve real-world problems.
		CO4	Understand basic dynamics concepts- force, momentum, work and energy;
		CO5	Understand and be able to apply Newton's laws of motion;
KCE302	Surveying and Geomatics	CO1	Describe the function of surveying and work with survey instruments, take observations, and prepare plan, profile, and cross-section and perform calculations.
		CO2	Calculate, design and layout horizontal and vertical curves.
		CO3	Operate a total station and GPS to measure distance, angles, and to calculate differences in elevation. Reduce data for application in a geographic information system.
		CO4	Relate and apply principles of photo grammetry for surveying.
		CO5	Apply principles of Remote Sensing and Digital Image Processing for Civil Engineering problems.
KCE303	Fluid Mechanics	CO1	Understand the broad principles of fluid statics, kinematics and dynamics
		CO2	Understand definitions of the basic terms used in fluid mechanics
		CO3	Understand classifications of fluid flow
		CO4	Apply the continuity, momentum and energy principles
		CO5	Apply dimensional analysis

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURAI)

KAS-301	Technical Communication (KAS-301)	CO1	Students will be enabled to understand the nature and objective of Technical Communication relevant for the work place as Engineers.
		CO2	Students will utilize the technical writing for the purposes of Technical Communication and its exposure in various dimensions.
		CO3	Students would imbibe inputs by presentation skills to enhance confidence in face of diverse audience.
		CO4	Technical communication skills will create a vast know-how of the application of the learning to promote their technical competence
		CO5	It would enable them to evaluate their efficacy as fluent & efficient communicators by learning the voice-dynamics.
KCC301	Cyber Security	CO1	The student will be able to discover software bugs that pose cyber security threats and to explain how to fix the bugs to mitigate such threats
		CO2	The student will be able to discover cyber attack scenarios to web browsers and web servers and to explain how to mitigate such threats
		CO3	The student will be able to discover and explain mobile software bugs posing cyber security threats, explain and recreate exploits, and to explain mitigation techniques.
		CO4	The student will be able to articulate the urgent need for cyber security in critical computer systems, networks, and world wide web, and to explain various threat scenarios.
		CO5	The student will be able to articulate the well known cyber attack incidents, explain the attack scenarios, and explain mitigation techniques
KCC351	Mini Project or Internship	CO1	The student gets a general knowledge about how to design and develop a mini project.
		CO2	The student gets an idea on how to work as a team to analyze a given problem definition.
		CO3	The student is able to use modern tools to develop a small database project by working as a team.
		CO4	The student is able to perform database connectivity from front-end applications.
		CO5	The student is made able to design and develop small sized applications using databases in the Back-end.
KOE4	Energy Science and	CO1	The basics of various forms of energy and its inter-conversion with the help of engines/systems based on thermodynamic cycle and

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

	Engineering		others.
		CO2	To recognize and recall the basics of nuclear reactor terminology, definitions, and concepts associated with reactor physics and theory and technology of nuclear power plant.
		CO3	To explain the principles that underlies the ability of various natural phenomena to deliver solar energy. Outline the technologies that are used to harness the power of solar energy.
		CO4	To understand processing and limitations of fossil fuels (coal, petroleum and natural gas) and identify and explain necessity of harnessing alternate energy resources.
		CO5	Students may realize the environmental problems directly related to energy production and consumption includes environmental pollution, monitoring and life cycle assessment.
KCE352	Surveying and Geomatics Lab	CO1	Describe the function of surveying and work with survey instruments, take Observations, and prepare plan, profile, and cross-section and perform calculations.
		CO2	Calculate, design and layout horizontal and vertical curves.
		CO3	Operate a total station and GPS to measure distance, angles, and to calculate difference in elevation. Reduce data for application in a geographic information system.
		CO4	Relate and apply principles of photo grammetry for surveying.
		CO5	Apply principles of Remote Sensing and Digital Image Processing for Civil Engineering problems.
KCE353	Fluid Mechanics Lab	CO1	The student will be able to understand the broad principles of fluid statics, kinematics and dynamics
		CO2	The student will be able to understand definitions of the basic terms used in fluid mechanics
		CO3	The student will be able to understand classifications of fluid flow
		CO4	The student will be able to apply the continuity, momentum and energy principles
		CO5	The student will be able to apply dimensional analysis.
KCE351	Building Planning & Drawing Lab	CO1	Understand scope of CAD software in building planning and drawing.
		CO2	Work on AutoCAD.

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

		IV-Sem	
KCE401	MATERIALS TESTING & CONSTRUCTION PRACTICES	CO1	Identify various building materials and to understand their basic properties.
		CO2	Understand the use of non-conventional civil engineering materials.
		CO3	Study suitable type of flooring and roofing in the construction process.
		CO4	Characterize the concept of plastering, pointing and various other building services.
		CO5	Exemplify the various fire protection, sound and thermal insulation techniques, maintenance and repair of buildings.
KCE402	INTRODUCTION TO SOLID MECHANICS	CO1	Describe the concepts and principles of stresses and strains
		CO2	Analyze solid mechanics problems using classical methods and energy methods
		CO3	Analyze structural members subjected to combined stresses
		CO4	Calculate the deflections at any point on a beam subjected to a combination of loads.
		CO5	Understand the Behavior of columns, springs and cylinders against loads.
KCE403	HYDRAULIC ENGINEERING AND MACHINES	CO1	Apply their knowledge of fluid mechanics in addressing problems in open channels.
		CO2	Solve problems in uniform, gradually and rapidly varied flows in steady state conditions.
		CO3	Have knowledge in hydraulic machineries like pumps and turbines.
KAS402	Engineering Mathematics-III	CO1	The students will be able to get the idea of Laplace transform of functions and their application
		CO2	The students will be able to get the idea of Fourier transform of functions and their applications
		CO3	The students will be able to get the basic ideas of logic and Group and uses
		CO4	The students will be able to get the idea s of sets, relation, function and counting techniques
		CO5	The students will be able to get the idea of lattices, boolean algebra,

			Tables and Karnaugh maps.
KCC402	Python	CO1	To read and write simple Python programs.
		CO2	To develop Python programs with conditionals and loops.
		CO3	To define Python functions and to use Python data structures —
		CO4	lists, tuples, dictionaries
		CO5	To do input/output with files in Python
			To do searching, sorting and merging in Python
KVE401	Universal Human Values	CO1	Understand the significance of value inputs in a classroom, distinguish between values and skills, understand the need, basic guidelines, content and process of value education, explore the meaning of happiness and prosperity and do a correct appraisal of the current scenario in the society and meaning of natural acceptance.
		CO2	Distinguish between the Self and the body, understand the meaning of Harmony in the Self the Co-existence of Self and body.
		CO3	Understand the value of harmonious relationship based on trust, respect and other naturally acceptable feelings in human-human relationships and explore their role in ensuring a harmonious society in family and society.
		CO4	Understand the harmony in nature and existence, and work out their mutually fulfilling participation in the nature. harmony in nature and existence.
		CO5	Distinguish between ethical and unethical practices, and start working out the strategy to actualize a harmonious environment wherever they work.
		CO6	harmony of professional ethics.
KCE451	MATERIAL TESTING LAB	CO1	Test the concrete materials as per KIS specifications.
		CO2	Test the different properties of Bricks.
KCE452	SOLID MECHANICS LAB	CO1	Design and conduct experiments, acquire data, analyse and interpret data
		CO2	Determine the behaviour of ferrous metals subjected to normal and shear stresses by means of experiments.
		CO3	Determine the behaviour of structural elements, such as Kars subjected to tension, compression, shear, bending, and torsion by

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

			means of experiments.
		CO4	Physical insight into the behaviour materials and structural elements, including distribution of stresses and strains, deformations and failure modes.
		CO5	Write individual and group reports: present objectives, describe test procedures and results, synthesize and discuss the test results.
KCE453	HYDRAULIC ENGINEERING AND MACHINES LAB	CO1	Study the flow characteristics in an open channel.
		CO2	Study the characteristics the Pumps and Turbines.
		V-Sem	
KCE501	Geotechnical Engineering	CO1	Classify the soil and determine its Index properties.
		CO2	Evaluate permeability and seepage properties of soil.
		CO3	Interpret the compaction and consolidation characteristics & effective stress concept of soil.
		CO4	Determine the vertical and shear stress under different loading conditions and explain the phenomenon of soil liquefaction.
		CO5	Interpret the earth pressure and related slope failures.
KCE502	Structural Analysis	CO1	Explain type of structures and method for their analysis.
		CO2	Analyze different types of trusses for member forces.
		CO3	Compute slope and deflection in determinate structures using different methods.
		CO4	Apply the concept of influence lines and moving loads to compute bending moment and shear force at different sections.
		CO5	Analyze determinate arches for different loading conditions.
KCE503	Quantity Estimation and construction Management	CO1	Understand the importance of units of measurement and preliminary estimate for administrative approval of projects
		CO2	Understand the contracts and tender documents in construction projects.
		CO3	Analyze and assess the quantity of materials required for civil engineering works as per specifications.
		CO4	Evaluate and estimate the cost of expenditure and prepare a detailed

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

			rate analysis report.
		CO5	Analyze and choose cost effective approach for civil engineering projects.
KCE-051	Concrete Technology	CO1	Understand the properties of constituent material of concrete.
		CO2	Apply admixtures to enhance the properties of concrete.
		CO3	Evaluate the strength and durability parameters of concrete.
		CO4	Design the concrete mix for various strengths using difference methods.
		CO5	Use advanced concrete types in construction industry.
KCE-055	Engineering Hydrology	CO1	Understand the scope of geological studies.
		CO2	Understand the rocks and its engineering properties.
		CO3	Understand the minerals and constituents of rocks.
		CO4	Understand the rock deformations, their causes effects and preventive measures.
		CO5	Understand the ground water reserves, Geophysical exploration methods and site selection for mega projects.
KNC 502	Indian Tradition, Culture and Society	CO1	To identify and understand the roots and details of Society State and Polity in India.
		CO2	To understand the importance of Indian Literature, Culture, Tradition, Practices and to apply in present system
		CO3	To analyze the Indian Religion, Philosophy, Practices and in shadow of Pre-Vedic and Vedic Religion, Buddhism, Jainism, Six System Indian Philosophy and to apply in
		CO4	To analyze the Science, Management and Indian Knowledge System and to apply in present system.
		CO5	To evaluate the Indian Architect, Engineering and Architecture in Ancient India, Indian's Cultural Contribution to the World and to create environment in Arts and
KCE554	Mini Project and Internship	CO1	Identify project planning objectives, along with various cost/effort estimation models.
		CO2	Organize & schedule project activities to compute critical path for risk analysis.
		CO3	Monitor and control project activities.

		CO4	Formulate testing objectives and test plan to ensure good software quality.
		CO5	Configure changes and manage risks using project management tools.
KCE551	CAD LAK	CO1	To understand scope of GIS in Civil Engineering.
		CO2	Work on GIS in the field of surveying.
KCE552	Geotechnical Engineering Lab	CO1	Examine the grain size distribution of soil.
		CO2	Determine the specific gravity and Atterberg limits of soil.
		CO3	Estimate the field density of soil by core cutter and sand replacement methods.
		CO4	Determine compaction and shear strength parameters of soil.
		CO5	Evaluate the differential free swell index and swelling pressure of soil.
			Obtain the compressibility, permeability parameters and CKR value of soil.
KCE553	Quantity Estimation and Management Lab	CO1	Study of DSR, CPWD specifications and NKC.
		CO2	Estimation of quantities for any one of the following: building/ Septic tank/Water supply pipe line/road/bridge.
		CO3	Preparation of Bill of Materials (BOM) for above project.
		CO4	Practice on open source project management software / MS Project/Primavera software for same problem.
		CO5	Study of any full set of tender documents (Institute shall provide the set from ongoing/ completed tenders).
		VI-Sem	
KCE601	Design of Concrete Structures	CO1	Analyse and Design RCC beams for flexure by IS methods.
		CO2	Analyse and Design RCC beams for shear by IS methods.
		CO3	Analyse and Design RCC slabs and staircase by IS methods.
		CO4	Design the RCC compression members by IS methods.
		CO5	Design various types of footings and cantilever retaining
KCE602	TRANSPORTATIO	CO1	Understand the history of road development, their alignment &

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

	N ENGINEERING		Survey.
		CO2	Design the various geometric parameters of road.
		CO3	Study the traffic characteristics & design of road intersections & signals.
		CO4	Examine the properties of highway materials & their implementation in design of pavements.
		CO5	Learn methods to construct various types of roads.
KCE603	Environmental Engineering	CO1	Assess water demand and optimal size of water mains.
		CO2	Layout the distribution system & assess the capacity of reservoir.
		CO3	Investigate physical, chemical & biological parameter of water.
		CO4	Design treatment units for water and waste water.
		CO5	Apply emerging technologies for treatment of waste water.
KCE604	Foundation Design	CO1	Understand various methods of Soil Exploration and its importance.
		CO2	Analyze bearing capacity and settlement of soil for shallow foundation.
		CO3	Design the various types of shallow foundation and understand the basics of deep foundation.
		CO4	Understand the characteristics of well foundations and retaining wall.
		CO5	Understand the concept of soil reinforcement.
KOE060	Idea to Kusiness model	CO1	Enhance creative knowledge of students regarding selection of a business idea and it's implementation process.
		CO2	Acquire knowledge on entrepreneurship development, its Pro's and con's.
		CO3	Acquire basic knowledge on how to become an Entrepreneur.
		CO4	Develop knowledge on Production systems and it's sustainability through production, planning and control (PPC)
		CO5	Develop appropriate business model and apply in a better way.
KNC601	Constitution of	CO1	Identify and explore the basic features and modalities about Indian

 Director

 Science & Technology
 FARAH (MATHURA)

	India		constitution
		CO2	Differentiate and relate the functioning of Indian parliamentary system at the center and state level.
		CO3	Demonstrate different aspects of Indian Legal System and its related bodies.
		CO4	Discover and apply different laws and regulations related to engineering practices.
		CO5	Interpret and evaluate the role of engineers with different organizations and governance models
KCE651	Transportation Engineering Lab	CO1	To conduct different tests to find various properties of pavement materials and soil subgrade.
		CO2	Use different instruments in traffic volume and traffic study.
KCE652	Environmental Engineering Lab	CO1	Gain knowledge in various parameters of water.
		CO2	Identify the significance to conduct experiments on water purity.
		CO3	Explain current environmental issues through laboratory experiments.
		CO4	Develop problem solving and laboratory skills using modern instrumentation
KCE653	Structural Detailing Lab	CO1	To verify Maxwell's Reciprocal theorem
		CO2	Horizontal thrust in a three-hinged arch and to draw influence line diagrams for Horizontal Thrust end bending moment.
		CO3	Classify cast irons and studies their applications.
		CO4	To find horizontal thrust in a two hinged arch and to draw influence line diagrams for horizontal Thrust and bending moment
		CO5	Study of SP34/IS13920/IS456:2000 for detailing of structural elements.
		VII-Sem	
KCE070	Railway, Waterway and Airway Engineering	CO1	Explain the importance of railway infrastructure.
		CO2	Identify the factors governing design of railway infrastructures.
		CO3	Analysis and design the railway track system.
		CO4	Understand the concepts of airport engineering and design

			components of airport.
		CO5	Associate with the concepts of water transport system.
KCE078	Irrigation and Water Resource Engineering	CO1	Describe the components of hydrological cycle, evaporation process and consumptive use.
		CO2	Apply the knowledge of stream flow measurement techniques and hydrograph theory for computation of run-off.
		CO3	Design different types of irrigation channels and water logging preventive measures.
		CO4	Design the regulatory and control systems of canal and irrigation outlets.
		CO5	Apply the knowledge of ground water hydrology and determination of discharge through wells.
KOE074	Renewable Energy Resources (KOE074)	CO1	Know about the renewable energy sources available at present.
		CO2	Understand the solar energy operation and its characteristics.
		CO3	Learn about the geothermal energy, MHD and Fuel Cell principles and its operation.
		CO4	Get the knowledge of wind energy and Thermo-electric operation and its types.
		CO5	Understand the biomass, Ocean Thermal and Tidal energy generation and its technologies.
KCE752	Mini Project and Internship	CO1	Developing a technical artifact requiring new technical skills and effectively utilizing a new software tool to complete a task
		CO2	Writing requirements documentation, Selecting appropriate technologies, identifying and creating appropriate test cases for systems.
		CO3	Demonstrating understanding of professional customs & practices and working with professional standards.
		CO4	Improving problem-solving, critical thinking skills and report writing.
		CO5	Learning professional skills like exercising leadership, behaving professionally, behaving ethically, listening effectively, participating as a member of a team, developing appropriate workplace attitudes.
KCE753	Project	CO1	Analyze and understand the real life problem and apply their

 Science & Technology
 FARAH (MATHURA)

			knowledge to get programming solution
		CO2	Engage in the creative design process through the integration and application of diverse technical knowledge and expertise to meet customer needs and address social issues.
		CO3	Use the various tools and techniques, coding practices for developing real life solution to the problem.
		CO4	Find out the errors in software solutions and establishing the process to design maintainable software applications
		CO5	Write the report about what they are doing in project and learning the team working skills
KCE751	Concrete Lab	CO1	Determine the various physical properties of cement.
		CO2	Examine the different physical test of coarse and fine aggregate.
		CO3	Analyze the properties of fresh and hardened concrete mix.
		CO4	Design and develop a performance based mix which can fulfill the requirements of ready mix concrete plant
		CO5	Describe and Demonstrate the Non-Destructive test (NDT) of concrete
			VIII-Sem
KHU802	Project Management and Entrepreneurship	CO1	Understanding basic concepts in the area of entrepreneurship
		CO2	adopting of the key steps in the elaboration of business idea generation and innovation
		CO3	understanding the stages of the entrepreneurial project Management
		CO4	Students should aware of project financing and budget details
		CO5	Developing the understanding and aspect of social entrepreneurship among students
KHU801	Rural Development: Administration and Planning	CO1	Students can understand the definitions, concepts and components of Rural Development
		CO2	Students will know the importance, structure, significance, resources of Indian rural economy.
		CO3	Students will have a clear idea about the area development programmes and its impact.

 Director
 Hindustan College of
 Science & Technology
 FARAH (MATHURA)

		CO4	Students will be able to acquire knowledge about rural entrepreneurship.
		CO5	Students will be able to understand about the using of different methods for human resource planning.
KOE085	Quality Management	CO1	Identify the contribution of quality gurus in TQM journey and acknowledge the importance of customers in manufacturing.
		CO2	Explain and analyze quality systems and organizational structures to apply quality principles in different processes
		CO3	Design an effective performance measurement system to optimize standard statistical process control techniques
		CO4	Describe and analyze various reliability methods / tests and the associated failure analysis methods
		CO5	Apply the concepts of ISO - 9000 and ISO -14000 standards in auditing techniques such as JIT and Taguchi Method.
KOE094	DIGITAL & SOCIAL MEDIA MARKETING	CO1	Students will develop an understanding of digital and social media marketing practices
		CO2	Students will develop understanding of the social media platforms
		CO3	Students will acquire the skill to acquire and engage consumers online
		CO4	Students will develop understanding of building organizational competency by way of digital marketing practices and cost considerations
		CO5	Students will develop understanding of the latest digital practices for marketing and promotion
KCE 851	Project	CO1	Analyze and understand the real life problem and apply their knowledge to get programming solution.
		CO2	Engage in the creative design process through the integration and application of diverse technical knowledge and expertise to meet customer needs and address social issues.
		CO3	Use the various tools and techniques, coding practices for developing real life solution to the problem.
		CO4	Find out the errors in software solutions and establishing the process to design maintainable software applications
		CO5	Write the report about what they are doing in project and learning the team working skills
